Paragon to Host Sage FAS Fixed Asset Management Sessions at Sage Summit

Paragon consultants will participate at Sage Summit helping Sage Customers through breakout sessions, conveying best practices for physical asset inventories, managing fixed assets, and using Sage FAS software.

Chicago, IL – October 13, 2009 – Paragon Systems (www.depreciationexperts.com), a provider of Sage FAS Fixed Asset Management Software and physical asset inventory services, has announced their participation in the 2009 Sage Summit Customer Conference. Paragon will host a booth on the trade show floor where their staff of fixed asset management experts will answer questions about [Sage FAS](#), conduct product demonstrations, discuss physical asset inventory strategies, and introduce value-added services for Sage FAS customers.

The annual [Sage Summit](#) conference brings Sage customers together to network with peers and product experts, attend hands-on learning sessions, participate in roundtable discussions, and learn about new ways to use their Sage software solutions. The 2009 conference will be hosted at the World Congress Center in Atlanta, Georgia and runs from November 9 to November 12.

According to Paragon President Scott Swarts, “Sage Summit is an important event for us since we work with Sage FAS Fixed Asset customers all over the country. It’s an opportunity to get some quality face time with them and discuss best practices of fixed asset management to ensure they’re getting the most from their investment in Sage FAS.”

Angie Bolton-Lyons, Senior Account Manager and Consultant at Paragon, says, “In addition to hosting hands-on Sage FAS guided demonstrations on the trade show floor, we’re also teaming up with Sage corporate personnel to co-present physical inventory best practices during several classroom-style breakout sessions.” She adds, “It’s going to be a busy conference and we’re looking forward to it.”

Ms. Bolton-Lyons is a Sage FAS expert, physical asset inventory veteran, and editor of the wildly popular fixed asset management blog “Crazy About Your Assets” at www.CrazyAboutYourAssets.com. The blog provides tips, expert advice, unique perspective, and best practices for managing fixed assets and conducting a proper physical asset inventory.

To visit with one of the fixed asset management experts from Paragon systems, stop by booth #317 during the Sage Summit conference November 9-12. Or check the conference agenda to register for a fixed asset management breakout session.

About Paragon Systems

Paragon Systems, a division of Paragon International, Inc. located in Schaumburg IL, is an authorized business partner of Sage Software and certified in the Asset Accounting and Inventory applications.
